

OPERATING NOTE N° 4/2017- December 18 *(Final)*

NOThWEST ARE TRANSPORT

FINALISATION OF EXCEPTIONAL OPERATING SITUATION LEVEL 0

The inputs-outputs balance in the Northwest area from day 12 to today December 18 has allowed to increase the stock in the tanks of Mugardos in relation with the value foreseen at the beginning of the operating note, thanks to a lower demand and higher inflows to the transport network through Tuy's international connection.

As a result, the exceptional operating situation level 0 stated in the Operating Note 4/2017 is dismissed as of tomorrow, December 19, at the beginning of the gas day, thus recovering complete normal operation.

During the validity period of said Operating Note, permanent coordination with REE has been kept regarding the supply of gas for the coverage of the electricity generation needs of the area.
