

# Operation Note No. 3/2025 on April 30, 2025 (final)

## **NATIONAL POWER SUPPLY FAILURE END OF EXCEPTIONAL OPERATING SITUATION**

The Spanish gas system continues to operate normally, with all facilities fully operational. The regasification plants, underground storage sites, and international connections are functioning according to the instructions of the Technical System Operator (GTS), aligned with user nominations and coordinated with adjacent operators.

Additionally, measures related to commercial management and imbalances from April 28, 2025, have been implemented in coordination with the National Commission for Markets and Competition (CNMC) and announced in Operational Note No. 3/2025 on April 29, 2025.

In accordance with the above, from the moment of the publication of this Operational Note, the Exceptional Operating Situation is considered concluded.

During this exceptional operating situation, the entire scheduled demand for natural gas was met safely, and the GTS maintained continuous coordination with the electricity system operator, adjacent operators, and the Competent Authorities.
